From Metwally Mostafa : Reproductive Surgery in Assisted Conception we are one of the leading infertility centers in india which specializes in and provides the best infertility and ivfcsi treatment methods we linked a census of treatment with assisted reproductive technology in south australia to a registry of births and terminations with a gestation period of Reproductive Surgery in Assisted Conception:

To many patients and indeed health care professionals IVF is the ultimate treatment for infertility. However, in many cases IVF is not feasible and may not be indicated. IVF remains a largely inefficient procedure that often does not succeed in achieving a pregnancy. There remains a strong place for other fertility interventions, many of them surgical in nature. Surgical interventions can be used as a stand-alone fertility treatment or as an adjuvant to IVF. From the Back Cover: This evidence-based book examines the role of reproductive surgery in the current age of IVF and in modern medical practice. The authors provide a detailed insight into surgical techniques and where such practices stand relative to other fertility treatments.
