diabetes mellitus is a chronic illness that requires continuing medical care and ongoing patient self management

education and support to prevent acute complications guidance advice and information services for health public health and social care professionals Complications in Acute Care Surgery: The Management of Difficult Clinical Scenarios:

This text provides the reader a starting point for the most difficult and uncommon complications in acute care surgery It is designed to provide options to that ubiquitous intra operative or bedside question 'Well now what do we do with this?' The topics have been chosen for the extreme difficulty of management and the surprising regularity that they present and the lack of large volume of accumulated evidence where expert experience remains vital
